WORK CUBE®

WC-100 Optional Activity Modules

WC-120 Heavy Duty Ladder – For balance skills. Brace holds ladder securely to the frame. 300-pound rated.

WC-118 Lever Arm Module – Two variable-resistance arms for repetitive horizontal or vertical movement. Simulates automobile shifter, drill press lever, handsaw, etc.

WC-190 Steering Wheel Module – Variable-resistance control with large wheel to simulate truck or bus.

WC-220 Foot Pedal Module – Gas, brake and clutch pedal for lower extremity activity. Simulates real force and feel of car and truck pedals. (Extra-heavy clutch option available.)

WC-160 Push-Pull Bar – Variable-resistance pivot-arm assembly for light-duty pushing or pulling. Similar to weight sled activities.
WC-100 Optional Activity Modules

**WC-210 Unilateral Weight Carrier** –
One-handed model of the Bilateral Weight Carrier. Simulates toolbox or suitcase for carrying tasks. Use with Heavy Duty Shelves for lifting activities and evaluations.

**WC-135 Mini-Weight Carrier** –
Weighs five pounds and holds 20 pounds of WORK CUBE® Weight Blocks for very light lifting. Extra-long handle for one and two-handed lifting.

**WC-192 Storage Bin Module** –
Five compartment bin for fine-motor and serial-sorting activities, and grasping tasks.

**WC-176 “Grip and Pinch” Activity Module** –
ADL activities. Car door handles and locks, dead bolt and hose faucet. Pretensioned with keys included.

**WC-215 Rotation Activity Module** –
Variable-resistance rotation activity for upper extremity exercise. Interchangeable handles and knobs are included. Torque wrench supplied to measure resistance settings.
